Professional Summary

I am a dedicated Full Stack Developer passionate about building high-quality, scalable applications from concept to deployment. I focus on attention to detail, problem-solving, and continuous professional growth to deliver impactful results.

Experience

Optiminastic

Full Stack Developer

July 2025 – Present

Mumbai, Maharashtra

- Developing end-to-end web applications using modern technologies including React, Node.js, and PostgreSQL.
- Collaborating with cross-functional teams to design and implement scalable software solutions using Agile methodologies.
- Working on both frontend user interfaces and backend API development to deliver comprehensive web applications.
- Contributing to code reviews, testing procedures, and deployment processes to ensure high-quality deliverables.
- Implementing responsive design principles and optimizing application performance for enhanced user experience across multiple devices.
- Participating in system architecture discussions and database design decisions to support scalable and maintainable codebases.

Projects

Code Network | TypeScript, React, Express, Convex, WebSockets

2024

- Streamlined Interview Process: Simplifies planning, conducting, and reviewing technical interviews on a single platform.
- Enhanced Collaboration: Real-time video calling and notifications enable smooth communication between interviewers and candidates.
- Efficient Management: Role-based access, an interview dashboard, and admin controls ensure organized scheduling and user handling.
- Professional User Experience: Clean, responsive UI with light/dark modes boosts productivity and usability.

Open Note | TypeScript, React, Express, MongoDB, Tailwind

2024

- Developed a full-stack web application to save and manage links to videos, tweets, and notes for later viewing.
- Implemented user authentication and secure data storage using JWT and MongoDB for robust security.
- Integrated conditional rendering, clipboard sharing, and media previews including YouTube embeds and Twitter widgets.
- Built responsive interface with modern design principles for optimal user experience across devices.

Technical Skills

Languages: TypeScript, Python, Java, JavaScript, HTML5, CSS3, SQL

Frontend: Nextjs React, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: PostgresSql, Firebase, MongoDB, MySQL

Tools & Technologies: Linux, Git, Github, Figma, WebSockets, DBMS, Computer Networks

Education

Tilak Maharashtra Vidyapeeth

June 2022 – May 2025

Bachelor of Computer Application

Mumbai, Maharashtra

- Overall GPA: 8.2/10 - Consistently maintained high academic performance throughout the program
- Completed comprehensive online courses on Coursera and Udemy specializing in Machine Learning, Web Development, and Full Stack Development
- Active participant in coding competitions and technical workshops organized by the university and external organizations

Relevant Coursework

- | | | | |
|-------------------|-----------------------|------------------------|-----------------|
| • Data Structures | • Database Management | • Software Engineering | • DBMS |
| • Algorithms | • Web Development | • Computer Networks | • Linux Systems |

Additional Information

Problem Solving & Continuous Learning

- Actively solved Data Structures and Algorithms problems on LeetCode and GeeksforGeeks platforms.
- Committed to learning and growing: Currently taking advanced courses and certifications to stay updated with new technologies and industry best practices.
